Heidi, and others. Looks like we did not receive a response from

Ex. 5 Deliberative Process (DP)

Ex. 5 Deliberative Process (DP) I'll get going on this next week.

Apologize in advance, but can you resend me the evaluation form we need to fill out?

**Subject:** Region 1 DES Requirement Notification requesting further information, GE-Pittsfield/Housatonic River Superfund Site

Ms. Bagocius

Thank you for the opportunity to provide supplemental information as part of the selection process for the upcoming oversight support at the GE-Pittsfield/Housatonic River Superfund site.

Let me know if you have any questions or need any additional information

Please confirm receipt of this Email.

Thank you,

**Ex. 4 CBI**

**Subject:** Region 1 DES Requirement Notification requesting further information, GE-Pittsfield/Housatonic River Superfund Site

**Importance:** High

CAUTION: [EXTERNAL] This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Good afternoon,

This email is to notify you that the EPA intends to issue a Cost Plus Fixed Fee task order (TO) to perform architect and engineering services under RAF DES CLIN001 for the GE-Pittsfield/Housatonic River Superfund site. The Site covers a wide geographic area beginning in Pittsfield Massachusetts and includes the Housatonic river and its associated floodplain from Pittsfield to the dam in Connecticut. See attached scope of work.

EPA will use the SF 330 information submitted at the time of contract selection and subsequently updated on an annual basis, past performance, as well as other information available to the agency to evaluate firms in accordance with FAR 36.602-1. The evaluation performed will consider the following factors. For this requirement, the factors are not of equal importance and are ranked accordingly:

1. Professional Qualifications
2. Knowledge of Locality
3. Specialized Expertise/technical competence
4. Capacity to Perform
5. Past Performance

Additionally, EPA is requesting that your firm, at no cost to the government, provide EPA with the following additional information on your qualifications and expertise:

Question 1. Describe your experience in large scale sediment remediation sites, including designing or overseeing dredging; hydraulic pumping; dewatering; sampling; monitoring; and riverine, floodplain and river channel restoration. Also, include experience in modeling such as watershed, hydrodynamic, sediment transport, and PCB fate and bioaccumulation models (HSPF, EFDC and FCM); conducting simulations; and modifying existing model codes for a large-scale sediment and floodplain project. No more than 5 Single-sided pages and no smaller than 10 point.

Question 2. Provide a staffing plan based on current resources and subcontractors to meet the objectives of the SOW. Describe key personnel for oversight of removal actions/groundwater; Rest of River Design documents, and project management. For any A&E services, only include A&E team subcontractors which were included in the awarded DES base level contract or those A&E team subcontractors that were modified into the contract thereafter in accordance with FAR Clause 52.244-2 SUBCONTRACTS (OCT 2010) – Alternate I (JUN 2007). No more than 2 pages not including resumes and no smaller than 10 point.

Question 3. This is a long-term project with significant field oversight required. As mentioned in the SOW, a field office can be made available for contractor use and/or option to lease. Provide a long-term approach to minimize travel costs, consideration of the use local personnel or relocation of key personnel to project area, and identification of specialty contractors/personnel needs to successfully implement project requirements. No more than 2 double-sided pages and no smaller than 10 point.

Respond to this request within the page and font limitations noted above. (independent of information submitted in the SF 330s). Any additional pages beyond the limits noted above will not be evaluated.

If your firm chooses not to submit the additional information requested above, EPA will evaluate your expertise and capabilities based on existing agency information, including your SF 330.

**Responses shall be submitted via Email no later than 06/11/2020 2:00PM EST.**

All questions regarding this request shall be directed to the undersigned Contracting Officer via Email.

Please confirm receipt of this Email.

Thank you.
